September 2008

Table of Contents

About the Data 1

The Year in Review 2

Alberta Exports by Industry 5

- Agriculture, Food and Beverages 7
- Mining and Energy 8
- Manufacturing 10
- Forestry (including Wood, Paper and Allied Products) 11
- Chemicals 12
- Machinery 13
- Electric, Electronic Equipment and Precision Instruments 14

Alberta Exports by Region 16

North America 17
- United States of America (U.S.) 17
- Top U.S. Markets 18
- Mexico 20

Asia 21
- China 22
- Japan 23
- South Korea 23
- Taiwan 24
- Hong Kong 24

Europe 24
- European Union 27
- United Kingdom 29
- Germany 29

Middle East and North Africa 29

Latin America and Caribbean 31

Sub-Saharan Africa 33

Appendices 35

Appendix A Alberta's Top 50 Export Sectors in 2007 36

Appendix B Alberta's Top 50 Export Products in 2007 37

Appendix C Alberta Export Destinations 38

Market Profiles 39
- Algeria 39
- Argentina 40
- Australia 41
- Bangladesh 42
- Belgium 43
- Brazil 44
- Chile 45
- China 46
- Colombia 47
- Cuba 48
- Denmark 49
- Ecuador 50
- Egypt 51
- France 52

Germany 53
Hong Kong 54
India 55
Indonesia 56
Iraq 57
Israel 58
Italy 59
Jamaica 60
Japan 61
Kazakhstan 62
Kuwait 63
Macau 64
Malaysia 65
Mexico 66

Commodity Export Summary by Market, 2003-2007 94

Appendix D Alberta Exports to the U.S. States 97

Appendix E Alberta Exports to the U.S. States Excluding Energy 98

Appendix F International Offices 99

This publication provides a summary of Alberta's international trade statistics for 2007, with sections for exports by industry and exports by region. A profile is also included for each country that imported more than $20 million of goods from Alberta in 2007. Each profile provides a chart tracking Alberta's total exports to the country since 1995, Alberta's top 20 export products and Canada's top 10 export products in 2007. Export totals are also provided for each U.S. state including and excluding energy products.

Because service exports are not currently available for provinces on a country-specific basis, in this report exports refers only to exports of goods, except in the introductory "Year in Review" section, which includes an estimate of Alberta's global services exports. In this report "exports" refers to "domestic exports"—those grown, extracted or manufactured in Canada—and does not include "re-exports"—goods imported into Canada and minimally processed but not substantially enhanced in value before being exported again.

Most of the trade statistics in this report are based on the internationally standardized Harmonized System (HS). The HS system is administered by the World Customs Organization and organizes all traded goods under a standardized six-digit, logically ordered numeric coding system. This system is used by more than 190 countries and forms the basis for customs tariffs, WTO or bilateral free trade negotiations and international trade statistics. The HS system is used in this report for all reporting of exports based on products. Sector and Industry-based export statistics in this report, though, are based on the North American Industry Classification System (NAICS), which was adopted by Canada, the United States and Mexico in 1997 to provide common definitions of the industrial structure of the three countries and a common statistical framework to facilitate the analysis of the three economies. Because of technical differences in how trade statistics are tracked with the HS and NAICS systems there may be small differences in reported exports depending on the system used.

Export data in the country profile tables is presented at the HS 6-digit level. Product descriptions have been shortened to fit the space available. Full product descriptions can be found in Statistics Canada's "The Canadian Export Classification 2008" at http://www.statcan.ca/english/tradedata/cec/index.htm.

Statistics Canada is the main source of information on goods trade for this publication. Estimates for service exports are developed by Alberta Finance and Enterprise based on special surveys conducted by Statistics Canada. Information on GDP growth and forecasts come from the Economist Intelligence Unit, unless otherwise noted.

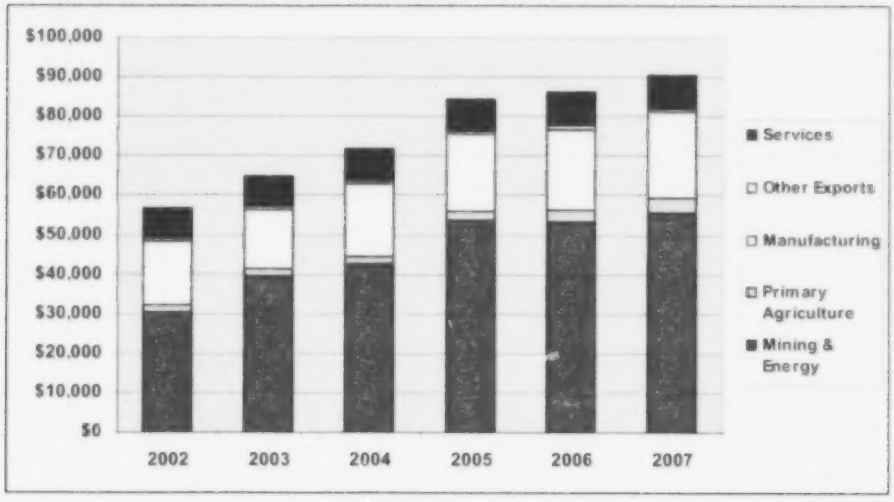
Alberta exported $90.4 billion worth of goods and services in 2007, an increase of 4.8% from the $86.2 billion[1] exported in 2006. This was composed of $82.0 billion in goods exports and $8.4 billion in services exports. Goods exports increased 5.5% while services exports fell 1.6%. Alberta's exports were imported by 192 countries around the world, with the top five markets being the United States, China, Japan, Mexico and the Netherlands.

Alberta's Exports of Goods and Services 2002-2007 ($CDN, Millions)



The Mining and Energy Sector led Alberta's exports, with a value of $55.4 billion in 2007, up 4.2% from $53.2 billion in 2006, with crude oil exports up 4.7% to $28.2 billion and natural gas and natural gas liquids up 3.1% to $26.3 billion. Primary agriculture exports leapt 23% to $3.8 billion, though this was due to a 30% increase in the value of exports of crops while livestock exports increased only 1.8%.

Alberta's Manufacturing Sector exports grew 6.6% in 2007 to a total value of $21.8 billion. Chemicals were Alberta's most important manufactured export, with sales of $7.2 billion in 2007, up 1.4% over the previous year. Food and Beverage industry exports were the next most important, with exports up 3.1% to $2.7 billion. Alberta's exports of machinery jumped 33% in 2007, to $2.7 billion from $2.0 billion in 2006. Exports of primary metal products rose 53% to $2.3 billion from $1.5 billion the previous year while exports of fabricated metal products rose 33% to $794 million.

Exports of computer and electronic products dropped 18% in 2007 to $1.1 billion from $1.3 billion the previous year but exports of electrical equipment rose 25% to $293 million from $236 million in 2006.

The Forestry industry had a difficult year in 2007, with exports of wood products declining 29% to $886 million from $1.2 billion in 2006, exports of paper products and woodpulp declining 4.5% to $1.4 billion and furniture exports (including prefabricated buildings) dropping 6.6% to $201 million.

[1] Statistics Canada has revised its estimation methodology for crude oil exports. This has led to significant upward adjustments to exports originating in Newfoundland and Saskatchewan and corresponding downward adjustments to Alberta exports. Thus there is a discrepancy between the 2006 exports reported in the Alberta International Trade Review – 2006 and the 2006 export figures reported this year.

Alberta's services exports, including receipts from tourism into the province, fell 1.6% to $8.4 billion compared to $8.5 billion in exports in 2006.

On a regional basis, North America continues to be Alberta's overwhelmingly most important export destination, absorbing 87% of total exports, though this picture is skewed by the value of energy exports, which are virtually all destined for the United States. Alberta's exports to the U.S. were up 3.2% in 2007 to $70.9 billion while exports to Mexico were up 16% to $715 million.

Alberta's next most important regional destination for exports was the Asia-Pacific, which absorbed $6.6 billion in exports in 2007, up 23% from $5.4 billion in 2006. The most important market in the region, and second largest market for Alberta's exports globally, was China, with exports up 29% to $2.8 billion. Exports to Japan increased 13% to $1.4 billion.

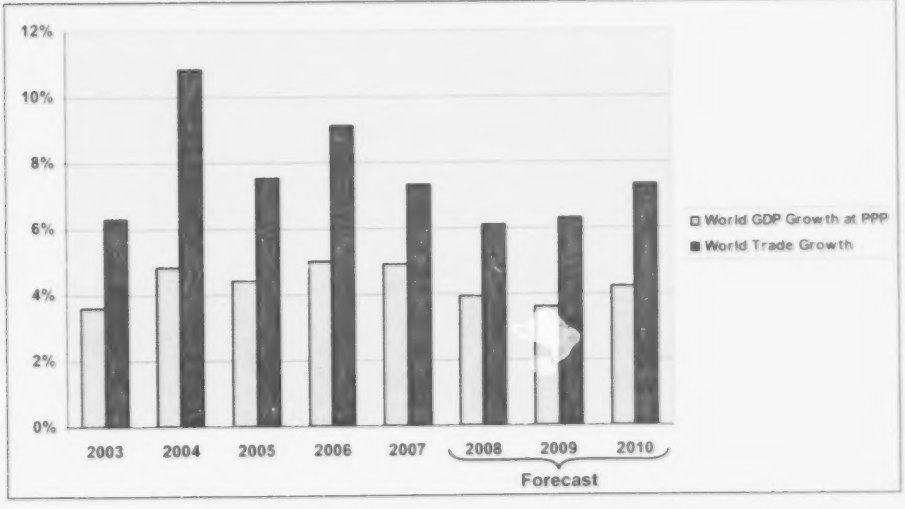
Alberta's exports to Europe and the former Soviet Union were worth $2.1 billion in 2007, a jump of 36% over the $1.5 billion of exports in 2006. The 27 members of the European Union were the destination for $1.7 billion in Alberta exports, a 41% increase over the $1.2 billion in exports in 2006. The countries of the Commonwealth of Independent States (CIS) imported $280 million in goods from Alberta in 2007, up 29% over the previous year, and other countries in Europe imported a combined $82 million, down 3.8% from 2006.

Latin America and the Caribbean (excluding Mexico) imported $727 million in goods from Alberta in 2007, up 15% from $631 million in 2006. The countries of South America imported $557 million, an increase of 39% from $400 million in 2006, while exports to Central America fell 64% to $28 million from $78 million in 2006. Exports to the Caribbean were valued at $141 million, down 7.6% from $152 million in 2006.

The Global Economy

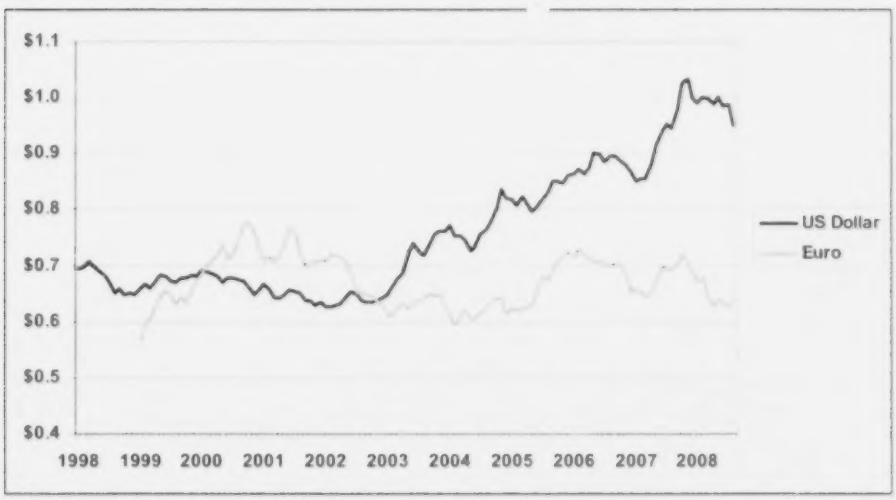
After strong growth through the first eight months of 2007, the global economy took a downturn in the fourth quarter as tightened credit in the wake of the sub-prime lending crisis in the United States spread around the world. This downturn has continued into 2008 and global economic growth is forecast to continue to be stunted through 2008 and 2009 before beginning to recover in 2010. The same pattern can be seen in world trade volumes.

World GDP at Purchasing Power Parity and Trade Volumes--% Change
(Source: Economist Intelligence Unit)



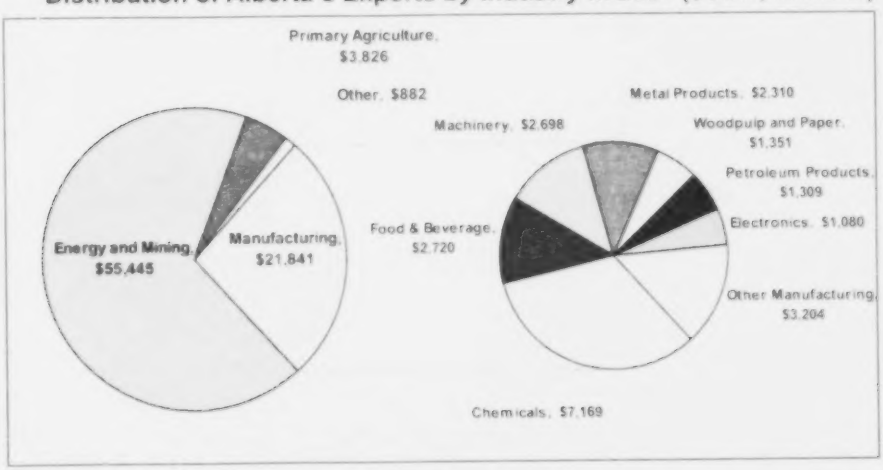
Over the course of 2007, the Canadian dollar climbed from U.S. $0.84 in February to a high of U.S. $1.10 on November 7. The high value of the Canadian dollar has mixed results for Alberta's exports. On the one hand, oil prices (as well as many other commodity prices) are denominated in U.S. dollars, so a low U.S. dollar in comparison to the Canadian dollar means that oil exports are worth more in Canadian dollars than they otherwise would have been. Thus the high Canadian dollar increases the Canadian dollar value of Alberta's oil exports, where prices are determined internationally. On the other hand, the high Canadian dollar made most other Alberta exports more expensive in the key U.S. market, thus decreasing demand. This was compensated for in 2007 for many Alberta exports by high international commodity prices.

Exchange Rates Canadian Dollar to US Dollar and Euro
(Source: Bank of Canada)



In 2007 the value of Alberta's exports of goods increased by 5.5% over 2006 to a record total of $82.0 billion. The Mining and Energy sector accounted for 68% of Alberta's goods exports in 2007. This share was unchanged from 2006 despite a 4.2% increase in the value of sector exports as non-energy exports grew by an even greater 8.2%. In total, in 2007, Alberta exported $26.5 billion in goods in sectors other than Mining and Energy, up from $24.5 billion in 2006.

Distribution of Alberta's Exports by Industry in 2007 ($CDN, Millions)



Mining and Energy sector exports totalled $55.4 billion in 2007, composed of 51% crude oil and 47% natural gas and gas liquids. Though exports of sulphur increased by 20% in 2007, exports of coal by 27%, and other mining and energy sector products by 42%, these industries together only accounted for 1.7% of energy and mining sector exports. Crude oil industry exports grew 4.7% in 2007 to $28.2 billion primarily on volume rather than price increases and natural gas industry exports grew 3.1% over 2006 to $26.3 billion, though this remains well below 2005 values.

Alberta's next most important export sector in 2007 was Manufacturing, with exports totalling $21.8 billion, up 6.6% over the previous year. Manufacturing sector exports were led by the chemicals industry, with exports up 1.4% to $7.2 billion, followed by the food and beverage manufacturing industry, with exports up 3.1% to $2.7 billion. Some of the largest exports increases, though, were recorded by the machinery and fabricated metal products industries, with exports up 33% for each. Most of the exports from these industries are oil and gas equipment. Technologies and expertise developed initially in catering to the domestic oil and gas industry is beginning to be increasingly marketed internationally. Exports of the woodpulp and paper product industry, the wood products industry, and the computer and electronic products industry continued declining in 2007.

Primary Agriculture sector exports leapt 23% in 2007 to a total of $3.8 billion. Exports of livestock increased 1.8% to $838 million but exports of crops jumped 30% on high commodity prices. Wheat export volumes declined slightly in 2007 but this was offset by a 33% rise in average price. Similarly, canola seed volumes also fell in 2007, again compensated for by a 33% rise in price.

Alberta Exports by Industry 2002-2007 ($CDN, Millions)

Industry	2002	2003	2004	2005	2006	2007	2006-2007 % Change
Primary Agriculture	**$ 2,279.1**	**$ 1,634.5**	**$ 2,018.5**	**$ 2,132.2**	**$ 3,113.7**	**$ 3,826.1**	**22.9%**

Non-Metallic Mineral Products	$ 141.9	$ 159.8	$ 159.4	$ 166.4	$ 140.3	$ 101.8	-27.4%
Other Exports	**$ 777.2**	**$ 759.6**	**$ 823.7**	**$ 775.1**	**$ 932.5**	**$ 878.1**	**-5.8%**
TOTAL GOODS EXPORTS*	**$ 48,931.5**	**$ 57,044.2**	**$ 63,687.6**	**$ 76,294.2**	**$ 77,739.9**	**$ 81,994.3**	**5.5%**
TOTAL SERVICES EXPORTS (ESTIMATE)	**$ 7,604.6**	**$ 7,652.7**	**$ 7,820.4**	**$ 8,083.2**	**$ 8,505.4**	**$ 8,367.3**	**-1.6%**
TOTAL EXPORTS*	**$ 56,536.1**	**$ 64,696.9**	**$ 71,508.0**	**$ 84,377.4**	**$ 86,245.3**	**$ 90,361.6**	**4.8%**
Total Value Added Exports	**$ 23,385.0**	**$ 22,642.5**	**$ 26,231.9**	**$ 27,802.8**	**$ 28,994.6**	**$ 30,208.5**	**4.2%**

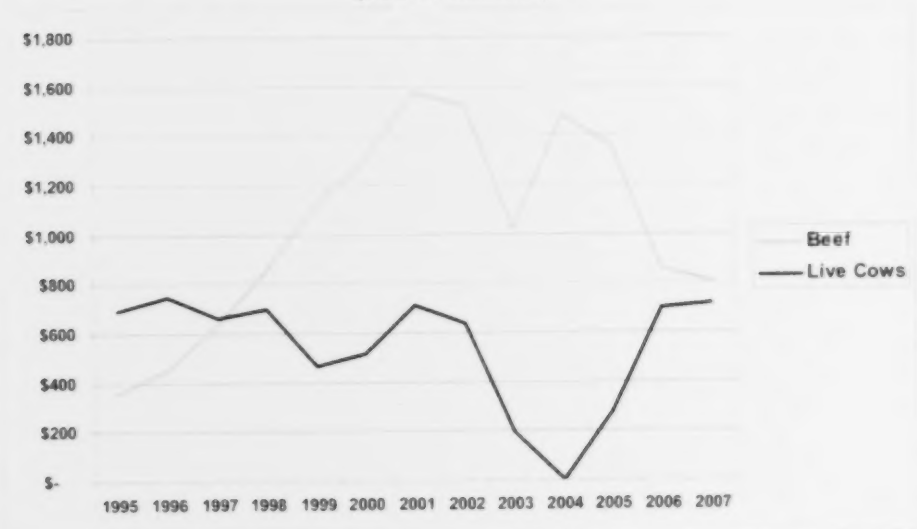
*Statistics Canada has revised its estimation methodology for crude oil exports. This has led to significant upward adjustments to exports originating in Newfoundland and Saskatchewan and corresponding downward adjustments to Alberta exports.

AGRICULTURE, FOOD AND BEVERAGES

Alberta's exports in the Agriculture and Food and Beverage Manufacturing Sectors increased 14% in 2007 to a total of $6.5 billion from $5.8 billion in 2006. Notable increases were seen in the value of exports of wheat (up 32% to $1.6 billion), canola seeds (up 29% to $923 million), canola oil (up 29% to $551 million), other grains (up 55% to $204 million), malt (up 42% to $137 million) and animal fodder (up 14% to $134 million). On the whole, exports of crops increased 30% to $3.0 billion in 2007. Commodity price increases were responsible for most of this rise in value. Wheat prices rose 33% over 2006, as did canola seed prices, with export volumes for both declining slightly. Barley experienced a rise in both price and volume (40% and 29% respectively), as did oats (19% and 9.4%). Canola oil exports rose 18% in volume and 18% in price. Exports to China leapt 428%, making this Alberta's top destination for canola oil globally in 2007.

The livestock and meat industries did less well in 2007. Fresh and frozen beef exports declined 5.6% to $810 million, though live cattle exports increased 2.9% to $718 million. The chart below illustrates the long-term trend of these two interconnected industries and the effect of the BSE crisis beginning in May 2003.

Alberta's Exports of Live Cattle and Fresh and Frozen Beef 1995-2007 ($CDN, Millions)



Pork exports declined as well, by 19% to $336 million, and exports of live swine fell 3.3% to $54 million. The decline in pork exports was volume rather than price based and across all of Alberta's top export markets for the product. Exports of other meats and offal, though, rose 13% to $154 million and exports of raw hides and skins increased 20% to $188 million. Exports of live horses fell 20% to $19 million.

Alberta's Major Agriculture, Food and Beverage Exports ($CDN, Millions)

	2006	2007	2006-2007 % Change
Wheat (Including Durum)	$ 1,189.2	$ 1,563.8	31.5%
Canola Seeds	$ 715.7	$ 922.7	28.9%
Beef	$ 857.2	$ 809.5	-5.6%
Live Cattle	$ 697.2	$ 717.7	2.9%
Canola Oil and Oilcake	$ 427.8	$ 551.4	28.9%
Pork	$ 412.2	$ 335.9	-18.5%
Frozen Vegetables	$ 221.3	$ 221.6	0.1%
Other Grains (Barley, Oats, etc.)	$ 131.2	$ 203.7	55.2%
Raw Hides and Skins	$ 156.5	$ 188.1	20.3%
Malt	$ 96.5	$ 136.7	41.7%
Animal Fodder	$ 117.6	$ 134.3	14.3%
Other Meats and Offal	$ 137.0	$ 154.2	12.6%
Legumes, Dried Shelled	$ 66.2	$ 60.0	-9.3%
Live Swine	$ 55.6	$ 53.8	-3.3%
Live Horses	$ 23.1	$ 18.6	-19.5%
Total Above	**$ 5,304.1**	**$ 6,072.0**	**14.5%**
Primary Agriculture	**$ 3,113.7**	**$ 3,826.1**	**22.9%**
Food & Beverage Manufacturing	**$ 2,638.1**	**$ 2,719.6**	**3.1%**
TOTAL AGRICULTURE, FOOD AND BEVERAGE EXPORTS	**$ 5,751.9**	**$ 6,545.7**	**13.8%**

MINING AND ENERGY

The value of Alberta's exports from the Mining and Energy Sector increased 4.2% in 2007, to $55.4 billion from $53.2 billion in 2006. 99.0% of Alberta's Energy sector exports went to the United States in 2007, but Mining sector exports were more diversified.

Alberta's Exports of the Energy and Mining Sector ($CDN, Millions)

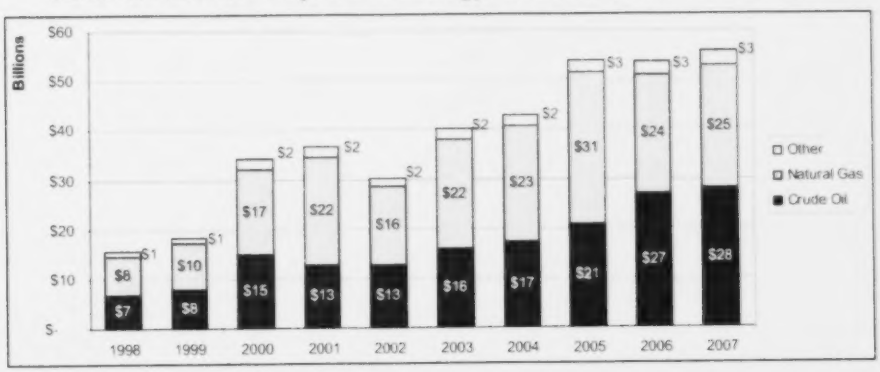
	2006	2007	2006-2007 % Change
Crude Oil	$ 26,942.3	$ 28,211.0	4.7%
Natural Gas & Natural Gas Liquids	$ 25,492.7	$ 26,283.2	3.1%
Coal	$ 319.5	$ 404.3	26.5%
Sulphur	$ 390.0	$ 466.8	19.7%
Other Mining & Energy	$ 56.3	$ 80.1	42.4%
Mining & Energy	**$ 53,200.8**	**$ 55,445.3**	**4.2%**

The following table shows price, volume and value for Alberta's exports of crude oil and natural gas to the United States in 2007 compared to 2006. The United States was the destination for 99.1% of Alberta's exports of crude oil (in 2007, Alberta exported $161.2 million of crude oil to China and $99.8 million to Singapore) and 100% of natural gas exports. Under natural gas liquids, propane exports increased 2.8% to $1.4 billion and butane liquids decreased 17% to $130 million.

Alberta's Exports of Crude Oil and Natural Gas to the United States

	2006	2007	% Change
Crude Oil			
Quantity (cubic metres)	69,715,503	71,723,189	2.9%
Average Price ($/cubic meter)	$ 386.35	$ 389.65	0.9%
Value ($ millions)	$ 26,934	$ 27,947	3.8%
Natural Gas			
Quantity (thousands of cubic metres)	88,218,567	95,763,805	8.6%
Average Price ($/thousand cubic metres)	$ 271.30	$ 258.02	-4.9%
Value ($ millions)	$ 23,934	$ 24,709	3.2%

Value of Alberta's Exports of Energy Products to the United States



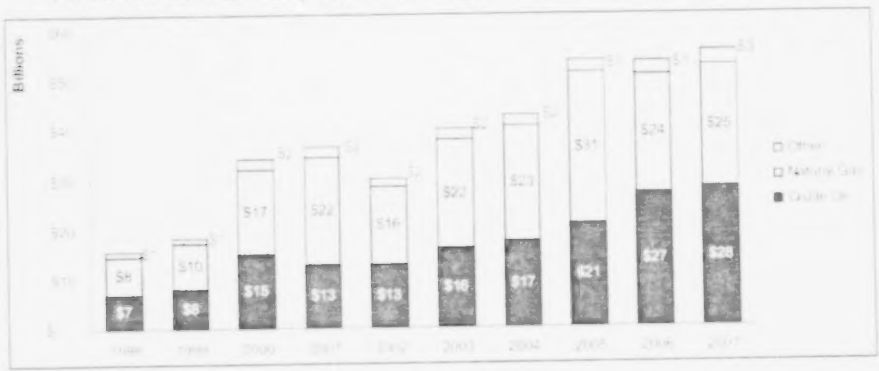
Exports of coal rose 26.5% in 2007despite a 5.3% fall in price due to a 34% increase in quantity exported. Total coal exports were worth $404 million in 2007, with 37% going to the United States, 32% to Japan, 16% to South Korea and 15% to other countries.

Sulphur in Alberta is produced as a by-product of the oil and natural gas industries. Exports rose 20% in 2007 to $467 million. China is the principal market, absorbing 54% of Alberta's exports in 2007, followed by Brazil at 12%, and the U.S. at 10%. The increase in the value of sulphur exports was the result of a 33% rise in price and despite a 10% drop in quantity exported.

Alberta's Exports of Crude Oil and Natural Gas to the United States

	2006	2007	% Change
Crude Oil			
Quantity (cubic metres)	69,715,503	71,723,189	2.9%
Average Price ($ cubic meter)	$ 388.35	$ 389.65	0.9%
Value ($ millions)	$ 26,934	$ 27,947	3.8%
Natural Gas			
Quantity (thousands of cubic metres)	88,218,567	95,763,805	8.6%
Average Price ($ thousand cubic metres)	$ 271.30	$ 258.02	-4.9%
Value ($ millions)	$ 23,934	$ 24,709	3.2%

Value of Alberta's Exports of Energy Products to the United States



Exports of coal rose 26.5% in 2007despite a 5.3% fall in price due to a 34% increase in quantity exported. Total coal exports were worth $404 million in 2007, with 37% going to the United States, 32% to Japan, 16% to South Korea and 15% to other countries.

Sulphur in Alberta is produced as a by-product of the oil and natural gas industries. Exports rose 20% in 2007 to $467 million. China is the principal market, absorbing 54% of Alberta's exports in 2007, followed by Brazil at 12%, and the U.S. at 10%. The increase in the value of sulphur exports was the result of a 33% rise in price and despite a 10% drop in quantity exported.

MANUFACTURING

Alberta's overall Manufacturing Sector exports rose 6.6% in 2007 to a total of $21.8 billion from $20.5 billion in 2006. The Manufacturing sector now accounts for 82% of Alberta's exports outside of the Mining and Energy sector. Chemical industry exports were the most important component, accounting for one-third of the sector's total exports. Chemical exports rose 1.4% in 2007 to $7.2 billion. This was followed by the Food and Beverage sector, which is discussed in more detail in the Agriculture, Food and Beverage section.

Machinery was Alberta's third most important manufactured export, valued at $2.7 billion in 2007, up 33% from 2006. Primary Metal Product exports leapt 53% over 2006 to $2.3 billion in 2007 and Fabricated Metal Product exports rose 33% to $794 million. Forestry exports, though, have continued to decline, with Woodpulp and Paper Product exports falling 4.5% to $1.4 billion and Wood Product exports dropping by 33% to $886 million. Exports of Computer and Electronic Products continued to decline in 2007, falling a further 18% to $1.1 billion from $1.3 billion in 2006. Electrical Equipment exports, though, rose 25% to $293 million.

Alberta's Manufacturing Exports ($CDN, Millions)

	2006	2007	2006-2007 % Change
Chemicals	$ 7,073.0	$ 7,169.2	1.4%
Food, Feed & Beverage	$ 2,635.7	$ 2,719.6	3.2%
Machinery	$ 2,035.0	$ 2,697.7	32.6%

MANUFACTURING TOTAL	**$ 20,489.2**	**$ 21,841.2**	**6.6%**

Forestry (including Wood, Paper and Allied Products)

Difficult conditions for Alberta's Forestry Manufacturing Industries continued in 2007, with overall exports down 16% to $2.2 billion. Woodpulp and Paper industry exports declined 4.5% to a total of $1.4 billion. Within this industry, woodpulp exports fell 1.7% to $1.2 billion, newsprint exports fell 17% to $108 million, paper exports dropped 12% to $42 million and carton exports fell 16% to $19 million. Wood Product exports as a whole dropped 29% to $886 million. Exports of this industry have plunged since the 2004 peak of $2.0 billion. Lumber exports fell 12% to $435 million, oriented strandboard exports fell 48% to $255 million and fibreboard exports fell 22% to $44 million. Prefabricated buildings exports were worth $60 million in 2007, down 30% from 2006.

Alberta's Exports of Forestry Manufacturing (Including Wood, Woodpulp, Paper and Wood Products) ($CDN, Millions)

	2006	2007	2006-2007 % Change
Woodpulp	$ 1,232.2	$ 1,211.2	-1.7%
Lumber	$ 494.8	$ 434.8	-12.1%
Oriented Strandboard	$ 487.0	$ 254.8	-47.7%
Newsprint	$ 129.7	$ 107.6	-17.1%
Prefabricated Buildings	$ 86.2	$ 60.1	-30.3%
Fibreboard	$ 56.1	$ 43.5	-22.4%
Paper	$ 47.8	$ 42.2	-11.7%
Builders' Joinery And Carpentry	$ 28.8	$ 23.0	-20.3%
Carton	$ 22.4	$ 18.8	-16.3%
Total Above	**$ 2,585.1**	**$ 2,196.0**	**-15.1%**
Paper Products & Wood Pulp	**$ 1,415.7**	**$ 1,351.5**	**-4.5%**
Wood Products	**$ 1,244.0**	**$ 886.3**	**-28.8%**
FORESTRY AND WOOD MANUFACTURING TOTAL	**$ 2,659.7**	**$ 2,237.8**	**-15.9%**

The United States is Alberta's most important market for woodpulp exports, with sales down 0.7% to $681 million. Exports to Asian destinations fell more steeply, with exports to Japan down 12% to $134 million, exports to South Korea down 5.4% to $114 million and exports to China down 7.5% to $103 million. 99% of Alberta's paper exports go to the United States, with sales there down 16% to $175 million.

The United States was the destination for 95% of Alberta's wood exports, but exports there were down 31% to $779 million in 2007 from $1.1 billion in 2006. The rise of the Canadian dollar, weakness in the U.S. housing market and increased competition were principally responsible for this decline.

Alberta exported $60.1 million of prefabricated buildings worldwide in 2007, with 83% going to the United States, where exports declined 27% to $50 million.

Chemicals

Alberta's exports from the Chemicals industry amounted to $7.2 billion in 2007, up 1.4%% from $7.1 billion in 2006. Plastics, principally ethylene, were Alberta's second most important export category overall, after energy. The U.S. was the market for 82% of Alberta's $3.4 billion in plastics exports in 2007, followed by China ($255 million) and Mexico ($123 million). Prices for ethylene, in the form of ethylene polymers and polyethylene, were down 11%, though export volumes increased 7.6%.

Organic chemicals were Alberta's fourth most important export category, with total exports in 2007 of $2.7 billion, up 10% from the previous year. 57% of Alberta's exports of organic chemicals went to the United States, with exports up 7.8% to $1.5 billion, but exports to China continue to rise, by 25% in 2007, to $1.1 billion. Ethylene glycol (antifreeze) accounted for 47% of Alberta's exports of organic chemicals in 2007, with China being by far the most important market. China absorbed 83% of Alberta's exports of ethylene glycol in 2007. Alberta's global exports of ethylene glycol increased 19% to $1.3 billion in 2007. Other organic chemical exports include styrene ($562 million, all to the United States) and acyclic hydrocarbons, together worth $594 million, also all to the U.S.

Alberta's exports of fertilizers were worth $505 million in 2007, up 17% from the previous year on a 6.8% increase in quantity and a 9.2% increase in price. Urea was the primary export product in this category, with exports up 17% to $396 million. 95% of Alberta's fertilizer exports went to the United States in 2007.

Inorganic chemical exports were worth $458 million in 2007, down 5.7% from $485 million in 2006. 85% of inorganic chemical exports went to the Untied States. Ammonia was the principal product, accounting for 74% of the total. Though the quantity of ammonia exported by Alberta decreased 12% in 2007, this was partially compensated for by a 7.8% increase in price, resulting in an overall 4.8% decline in the value of exports.

Alberta's Exports of Chemicals ($CDN, Millions)

	2006	2007	2006-2007 % Change
Ethylene Polymers	$ 1,787.2	$ 1,747.2	-2.2%
Ethylene Glycol	$ 1,066.7	$ 1,271.7	19.2%
Polyethylene, s.g. > 0.94	$ 1,100.1	$ 1,031.8	-6.2%
Styrene	$ 479.1	$ 561.8	17.3%

Machinery

Alberta's machinery exports increased by 33% in 2007, to a record $2.7 billion. Much of this machinery are for use in the oil and gas sector. Alberta companies have developed technologies and expertise that initially catered to the domestic energy sector but are increasingly finding their products in demand internationally. Alberta exported $785 million of boring/sinking machinery, $354 million in liquid pumps, $289 million in taps/cocks/valves, $276 million in air/gas compressors, as well as $82 million in centrifuges and filters and $43 million in distilling/rectifying plants.

Alberta's machinery export destinations are very diversified. While 62% go to the United States, Russia, the second largest market, received only 3.5% of the total and Australia, the third largest market, 2.6%. 63 countries imported more than $2 million in machinery from Alberta in 2007.

Alberta's Machinery Exports ($CDN, Millions)

Electrical, Electronic Equipment and Precision Instruments

Alberta's overall exports of the Electrical, Electronic and Computer Equipment Industries fell 11.7% in 2007, to $1.4 billion from $1.6 billion in 2006. Computer and Electronic Product industry exports fell 18%, from $1.3 billion to $1.1 billion, while Electrical Equipment industry exports rose 25% from $236 million to $293 million.

Alberta's Electrical, Electronic and Computer Exports ($CDN, Millions)

	2006	2007	2006-2007 % Change
Telephone Equipment	$ 189.2	$ 263.5	39.3%
Surveying/Geophysical Instruments	$ 195.8	$ 241.0	23.0%
Instruments for Physical Analysis	$ 122.6	$ 113.0	-7.9%

Electric Sound/Visual Signalling	$ 23.8	$ 26.5	11.7%
Unrecorded Media	$ 0.4	$ 23.8	5940.3%
Artificial Body Parts	$ 18.8	$ 19.7	4.8%
Spectrum Analyzers	$ 15.5	$ 14.7	-4.7%
Total Above	**$ 1,451.2**	**$ 1,302.8**	**-10.2%**
COMPUTER AND ELECTRONIC PRODUCTS	**$ 1,320.5**	**$ 1,080.0**	**-18.2%**
ELECTRICAL EQUIPMENT	**$ 235.5**	**$ 293.4**	**24.6%**
TOTAL COMPUTER, ELECTRONIC, ELECTRICAL	**$ 1,556.0**	**$ 1,373.4**	**-11.7%**

Products in these industries can be divided into three categories. Computer and computer component exports fell 34% to $54 million in 2007 from $81 million the previous year. Electrical machinery exports fell 19% to $772 million from $957 million in 2006. In this category, Alberta's most important export is telephony equipment, where exports grew 39% to $263 million from $189 million in 2006, however, this remains far below the 2000 peak of $2.0 billion. The second most important product, radar and radio-navigation equipment, rose 14% to a record $58 million in 2007.

Exports in the third category, precision instruments, rose 7.9% to a record $620 million in 2007. Many products in this category are probably for use in the energy industry. The most important export product in the category for Alberta in 2007 was surveying and geophysical instruments, with exports up 23% to $241 million. Exports of instruments for physical analysis fell 7.9% to $113 million. Instruments for measuring flow fell 7.0% to $54 million.

For both electrical machinery and precision instruments the U.S. was the main market, accounting for approximately 65% of sales, with the United Kingdom second at around 6%, though markets were very diversified, with around 30 countries importing more than $2 million in each category in 2007.

North American Free Trade Agreement (NAFTA) partner countries continued to be Alberta's largest international export market region in 2007, accounting for $71.6 billion or 87% of total shipments. This includes 62% of Alberta's non-energy exports. Alberta's export concentration in the U.S. market for non-energy products is lower than that of all but three other provinces. Nonetheless, North America remains overwhelmingly Alberta's most important export region. Alberta's exports to the Asia-Pacific continued to grow in 2007, and this region was Alberta's second most important export destination, capturing 8.0% of Alberta's exports, or 59% of non-US exports.

Following is a report on Alberta's exports by region, with key countries for each region highlighted. Please see the Market Profiles section for detailed export statistics on individual countries.

Alberta's Exports by Region in 2007 (Shares ex-US): Total = $82.0 billion

	Value $CDN, millions		% Change 2006-2007	Share Total 2007	Share Ex-US 2007

NORTH AMERICA

North America is Alberta's most important trade region, accounting for 87% of Alberta's exports in 2007. Alberta's merchandise exports to NAFTA partners, the U.S. and Mexico, were valued at $71.6 billion in 2007, up 3.3% from $69.3 billion in 2006. 99% of Alberta's North American exports were destined for the United States. Energy products accounted for 78% of Alberta's exports to North America, led by crude oil ($27.9 billion), followed by natural gas ($26.6 billion) and $1.2 billion worth of other energy products. Non-energy exports to North America were worth $15.9 billion in 2007, an increase of 1.4% from the $15.7 billion of non-energy products exported in 2006.

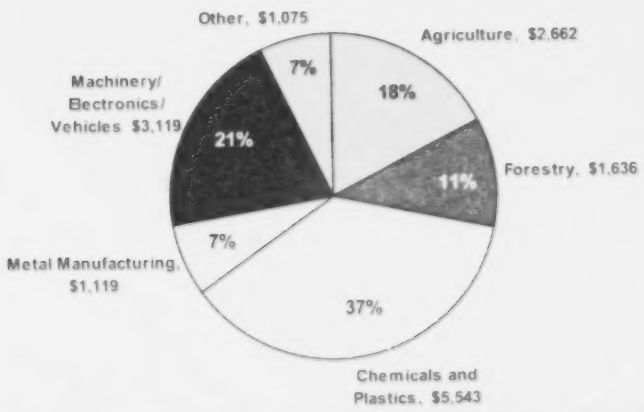
United States of America

The U.S. economy grew by 2.2% in 2007, weakening considerably towards the end of the year. Growth is forecast for 1.2% in 2008, which, combined with a lower U.S. dollar, might result in slackened demand for Alberta exports, though high commodity prices might counteract this somewhat.

The U.S. is Alberta's largest trading partner by far, accounting for 87% of Alberta's total exports. 2007 Exports were valued at $70.9 billion, an increase of 3.3% from the $68.7 billion exported in 2006. Energy accounted for 79% of Alberta's U.S. exports in 2007 and virtually 100% of Alberta's energy exports were destined for the U.S. market. The value of Alberta's energy exports to the US was $55.8 billion, up 3.9% from $53.7 billion the year before. The average price obtained for Alberta's exports of crude oil remained flat in 2007 and the average price of natural gas fell by 4.9% compared to the previous year, but this was compensated for by increases in the volume shipped of 2.9% for crude oil and 8.6% for natural gas. The result was a gain of 3.8% in the value of crude oil exported to the US, to a total of $27.9 billion and a gain of 3.2% in the value of natural gas exports to $24.7 billion. See the Mining and Energy Sector section for tables and charts illustrating these trends.

Alberta's non-energy exports to the US increased by 0.8% in 2007, to $15.2 billion from $15.0 billion in 2006.

ALBERTA'S NON-ENERGY EXPORTS TO THE U.S. IN 2007 ($CDN, MILLIONS)



Agricultural exports rose 3.9% to $2.7 billion in 2007. Meat exports declined 8.6% from $854 million in 2006 to $780 million in 2007. Live animal exports, though, rose 1.2% to $777 million. Of these exports, in 2007, $712 million was live cows and $621 million was beef. After meat and live animals the next most important Alberta agricultural export to the U.S. was cereals. Cereals exports increased 86% from $131 million in 2006 to a record $244 million in 2007. Primarily responsible for the increase in cereals exports was a doubling of shipments of wheat, to $159 million in 2007, along with a 227% increase in shipments of barley ($34 million) and an increase of 24% for oats ($45 million). The growth in the value of cereals exports in 2007 was due to both increased commodity prices as well as volume shipped. Exports of canola seeds and canola oil to the U.S. also rose in 2007. Canola seed exports increased 16%, to $106 million and canola oil exports increased 38% to $124 million.

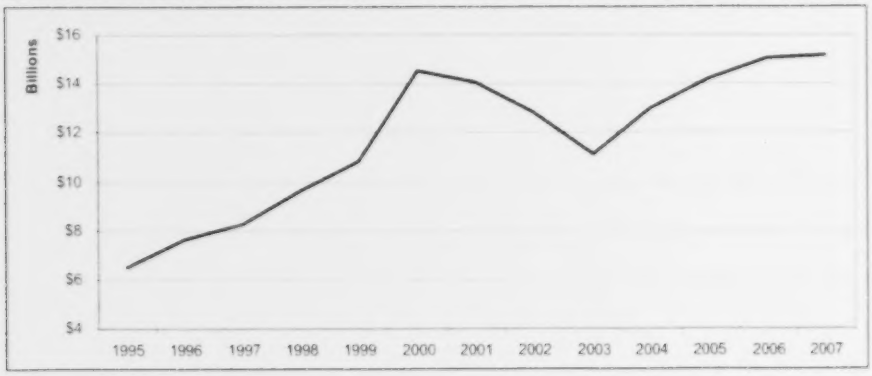
Forestry sector exports to the U.S. suffered in 2007, with exports of wood down 31% to $779 million, exports of woodpulp down 0.7% to $681 million and exports of paper down 17% to $175 million. Overall, sector exports to the U.S. declined 19% to a total of $1.6 billion in 2007. A continued downturn in the U.S. housing market should continue to depress wood exports in 2008.

Chemicals and plastics continued to be Alberta's most important non-energy export sector to the US in 2007, though overall exports declined 1.7% to $5.5 billion. Plastics exports fell 9.3% to $2.8 billion, though exports of organic chemicals rose 7.8% to $1.5 billion. Other important exports in this sector include fertilizers (up 13% to $482 million) and inorganic chemicals (down 9.4% to $391 million).

Exports to the U.S. of metal and metal goods jumped 37% in 2007, to $1.1 billion, from $818 million in 2006 and only $360 million in 2003. Alberta's exports of pipeline rose 63% to $555 million and exports of derricks jumped by 109% to $80 million. These are examples of the creation in the province of new value-added export industries that originally arose to cater to the domestic oil and gas sector but that developed internationally competitive technologies and have begun to expand to international markets—to the U.S. but also further afield.

In the machinery/electronics/vehicles sector there are many other examples of this expansion into international markets of Alberta companies that have developed technologies for the oil and gas sector. Alberta's exports to the U.S. in the machinery/electronics/vehicles sector rose 11% in 2007 to a total of $3.1 billion. Exports of machinery, most for oil and gas exploration, extraction and processing, rose 31% in 2007 to a record $2.0 billion. Exports of precision instruments (including surveying instruments, geophysical instruments, gas analysis instruments, etc.) rose 27% to a record $395 million. Vehicle exports (again often specialized for the oil and gas industry) remained unchanged at $221 million. Exports of electrical machinery, though, continued a long decline from the 2000 peak of $4 billion, reaching $509 million in 2007.

ALBERTA'S NON-ENERGY EXPORTS TO THE US 1995-2007 ($CDN, BILLIONS)



Top US Markets

The US Midwest region and California are the major markets for Alberta oil and natural gas. Because these energy exports move by pipeline and are difficult to allocate to the state of final destination, they are excluded from the following state export totals. For a breakdown of exports including energy by state and for a complete list of non-energy exports to all US states please refer to the Appendices.

Excluding energy commodities (and not counting the US as a whole), Texas is Alberta's second most important export destination after China, followed by California, Japan, Illinois, Colorado, Washington and Mexico.

- **Texas**—Alberta's exports to Texas, the most important market in the United States, jumped 18% in 2007 to a record $2.3 billion (excluding energy). Machinery, primarily oil and gas equipment, was the most important export sector, worth a total of $757 million in 2007, up 51% from 2006. Plastics exports were worth $434 million in 2007, organic chemical exports were worth $285 million, and precision instrument exports were up 40% to $142 million.
- **California**—Exports to California fell 15% in 2007 to $1.4 billion (excluding energy). Exports of organic chemicals to California fell 29% in 2007 to $276 million. Alberta's second most important export to California, meat, rose by 2.2% to $225 million. Plastic exports worth $114 million in 2007, down 2.7%. The biggest drop, though, was in exports of wood, which plunged 49% to $114 million.
- **Illinois**—Illinois is a major market for Alberta natural gas exports but is also the third most important state for non-energy exports as well, worth $836 million in 2007, up 6.6% from the previous year. Plastic was Alberta's top non-energy export, worth $225 million in 2007, up 5.2% from 2006, followed by organic chemicals, up 42% to $222 million.
- **Colorado**—Alberta's non-energy exports to Colorado jumped 66% in 2007 to a total of $805 million thanks to a 171% leap in exports of live animals to $181 million, a jump of 78% in exports of machinery to $159 million and a rise of 31% in exports of iron and steel products to $110 million.

Alberta's Exports to the US by State Excluding Energy Commodities ($CDN, Millions)

Rank	State	2007	% Total	2006	% Total	% Change 2006-2007
1	Texas	$ 2,273.2	15.0%	$ 1,927.5	12.8%	17.9%

	Other States	**$ 3,500.9**	**23.1%**	**3,687.1**	**24.5%**	**-5.0%**
Total Exports to the US		**$ 15,154.4**	**100%**	**$ 15,039.1**	**100%**	**0.8%**

Mexico

The Mexican economy expanded by 3.3% in 2007, down from 4.8% in 2006. Growth is expected to slow in 2008 because of the Mexican economy's close link to US economic conditions, though high oil prices will somewhat counteract this. GDP growth in 2008 is forecast to be 1.9%, improving slightly to 2.8% in 2009.

Alberta's exports to Mexico increased 16% in 2007 to a record $715 million. Canola seeds were Alberta's top export product, worth a record $186 million, up 37% from 2006. Other important agricultural exports to Mexico in 2007 included fresh beef (exports unchanged from 2006 at $116 million), wheat (exports down 8% to $83 million) and offal (exports up 61% to $21 million).

The most important non-agricultural export was ethylene polymers, worth $122 million, up 3% from 2006. Machinery sector exports as a whole leapt 114% from the $24 million exported in 2006 to $52 million in 2007.

Alberta accounted for 17% of Canada's exports to Mexico, second only to Ontario, and up from a 15% share in 2006. Mexico was Alberta's fourth most important international export market in 2007.

ASIA-PACIFIC

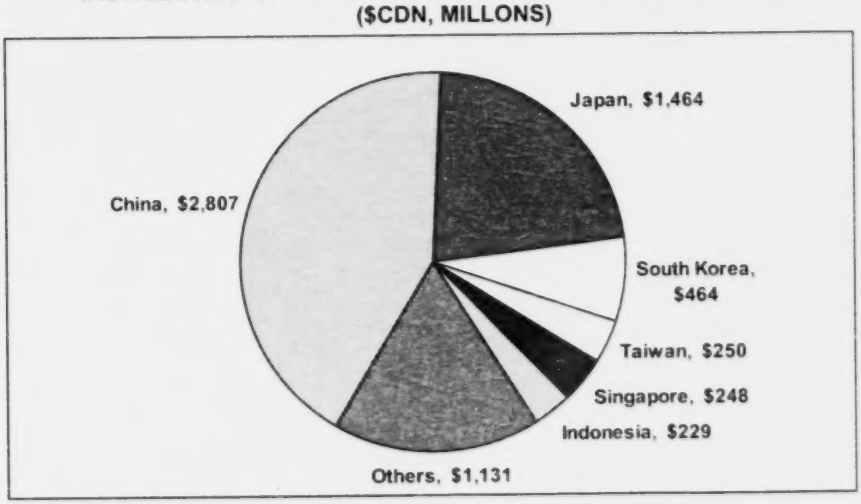
With a population of over 3.5 billion, the Asia-Pacific region is Alberta's next most important export destination after North America. Though the spectacular economic growth rates achieved over the past few years are expected to slow in 2008, the importance of this region to Alberta's exports will only continue to grow.

Economic growth in the region in 2007 ranged from a low of 2.1% for Japan to a high of 11.9% for China. India grew at 8.7% and South Korea at 5.0%. The regional economy is expected to slow in 2008, with forecast growth rates of 9.8% for China, 7.6% for India, 4.5% for South Korea and 1.1% for Japan.

Overall, Alberta's exports to the Asia-Pacific region rose 22% in 2007, from $5.4 billion in 2006 to $6.6 billion in 2007. Alberta was the second largest provincial exporter to the region, after British Columbia. Overall Canadian exports to the region were $31.7 billion in 2007, an increase of 7.1% from the year before.

Ethylene glycol was Alberta's top export product to the region in 2007, with exports up 14% to $1.1 billion. Almost all of these exports went to China. Canola seeds was the next most important export, worth $595 million. Japan was the largest market for this product in the region, absorbing 38% of Alberta's global canola seed exports, with 2007 sales up 34% to $352 million. Canola seed exports to China recovered from the low of $11 million exported in 2002 to $135 million in 2007, though this remains below the high of $142 million exported in 1998. Cereals, principally wheat, was Alberta's third most important export sector to the Asia-Pacific region in 2007, with exports up 19% to $626 million. Indonesia was the most important market for Alberta's cereal exports to the Asia-Pacific in 2007, followed by Japan, Sri Lanka, Bangladesh and the Philippines. Nickel exports were worth $517 million in 2007, up 7.2%. Alberta exported $469 million of energy products to Asia in 2007, including $193 million of coal to Japan and South Korea and $261 million of crude oil to China and Singapore.

DISTRIBUTION OF ALBERTA'S EXPORTS TO ASIA-PACIFIC IN 2007 ($CDN, MILLONS)



ALBERTA'S EXPORTS TO ASIA-PACIFIC ($CDN, MILLIONS)

Country	2005	2006	2007	2006-2007 % Change	2007 Share Region
China	$ 2,017.1	$ 2,173.8	$ 2,807.4	29.2%	42.6%

China

Alberta's exports to China have increased by 193% in the last five years, from $957 million to $2.8 billion. Since 2004, China has been Alberta's second most important export destination after the United States. Alberta is the largest provincial exporter to China, accounting for 32% of total Canadian exports.

China's economic growth rate has averaged 10.8% over the last five years and reached 11.9% in 2007. This economic growth rate is expected to slow to 9.8% in 2008 and 9.0% in 2009 as exports decline on lowered global demand and increased shipping costs. Nonetheless, net inward foreign direct investment is forecast to reach $85 billion in 2007 and $95 billion in 2008 on top of 2007 stocks of $378 billion.

Ethylene glycol was Alberta's most important export product to China, worth $1.0 billion in 2007, up 26% from 2006 on a 15% increase in price and a 9.0% increase in quantity. Nickel was the second most important export product, worth $304 million in 2007, up 3.7% from the previous year. Sulphur was the third most important export. The value of sulphur exports rose 18% in 2007 to $255 million, with an increase in the price of exports of 51% more than compensating for a drop in quantity exported of 22%. Ethylene polymers were the fourth most imoprtant export product, with exports up 33% to $236 million. Canola oil exports leapt 428% to become Alberta's fifth most important export product to China in 2007, with $202 million in sales.

Alberta's sixth most important export to China in 2007 was crude oil. Though worth only $161 million in 2007 could increase greatly in the future. If I goes ahead, Enbridge's Gateway pipeline would ship 400,000 barrels per day of oilsands derived crude to the West Coast for shipment onwards to Asia by tanker.

Japan

Though the Japanese economy has been in the doldrums for the past decade, Japan was, until 2004, Alberta's second most important export destination after the United States and remained in 2007 Alberta's third most important export market. GDP growth was 2.1% in 2007 and is forecast for 1.1% in 2008 and 1.3% in 2009.

Alberta's exports to Japan have recovered from a 2003 low of $1.0 billion to $1.5 billion in 2007, up 13% from $1.3 billion in 2006. This remains, though, below the $1.8 billion peak exported in 1995. Alberta was the second largest provincial exporter to Japan in 2007, behind British Columbia.

Canola seeds was Alberta's top export to Japan in 2007, worth $352 million, up 34% from the previous year, entirely on an increase in the average price rather than on volume. Pork, fresh and frozen, was the second most important export product, though exports fell 15% to $155 million. Coal exports were worth $127 million in 2007, followed by chemical woodpulp, down 16% to $122 million. Cobalt exports were worth $114 million, up 76% on an increase in average price. Exports of animal fodder were valued at $106 million, up 15%, and wheat exports were worth $104 million, up 27%, again on price increases rather than volume.

South Korea

South Korea was Alberta's third most important export destination in the Asia-Pacific region and sixth globally in 2007. Alberta's exports to South Korea have shown slight cyclical variations but basically have held steady over time, averaging $484 million per year since 1995. In 2007 Alberta exported $464 million to South Korea, up 7.6% from $431 million in 2006. Alberta was the third largest provincial exporter to South Korea, accounting for 16% of Canada's exports in 2007.

Canada has been negotiating a free trade agreement with South Korea since July 2005. By March 2008, thirteen rounds of negotiation had taken place. In the meantime, South Korea completed free trade negotiations with the United States, though the agreement has not been ratified by the US Congress. Mass protests at the resumption of imports of US beef have pressured the South Korean government and this reaction might make the completion of a free trade agreement with Canada more difficult, since the resumption of Canadian beef exports is a precondition for Canada in finalizing a deal. South Korea is also negotiating a free trade agreement with the European Union. The South Korean economy grew 5.0% in 2007, but this is expected to slow slightly to 4.5% in 2008 and 4.3% in 2009 due to inflationary pressures and slowed economic reform because of the South Korean government's weakened position after the protests.

Chemical woodpulp was Alberta's top export product to South Korea in 2007, worth $101 million, down 11% from $113 million in 2006. This was followed by ethylene glycol ($66 million, up 13%), coal ($66 million, up 36%), unwrought nickel ($39 million, up 3.5%), raw hides and skins ($29 million, up 95%), and fresh or frozen pork ($28 million, down 15%).

Taiwan

In 2007, Taiwan was Alberta's fourth most important export destination in the Asia-Pacific region and eighth in the world. Alberta was the third largest provincial exporter to Taiwan, accounting for 17% of Canada's total exports. Alberta's exports to Taiwan vary cyclically, with an average of $238 million in annual exports between 1995 and 2007. 2007 exports were worth $250 million, up 42% from 2006's $176 million.

In 2007, Taiwan's GDP grew by 5.7% and 2008 growth is forecast to be 4.3%, followed by 4.4% growth in 2009, with domestic demand rather than exports being the main fuel for the economy.

Ethylene polymers were Alberta's top export to Taiwan in 2007, worth $56 million, up 21% from 2006. This was followed by exports of raw hides and skins, worth $49 million, up 12% from the previous year. Nickel was the third most important export, with a 59% increase in price and a 12% increase in quantity resulting in a 78% increase in the value of exports over 2006 to a total of $27 million. Chemical woodpulp exports were worth $21 million, with another $16 million in exports of semi-chemical woodpulp (up 77% and 163% respectively). Canola oil exports were worth $21 million, an increase of 28% and cobalt matte exports were valued at $18 million, 237% more than in 2006.

Hong Kong

Hong Kong was Alberta's eighth most important Asia-Pacific export market and 17th global market, with exports up 19% to a record $133 million in 2007. Alberta accounted for 10% of Canadian exports to Hong Kong in 2007.

Hong Kong's economy grew at a rate of 6.3% in 2007, down from the 7% to 8.5% rates of 2004-2006 but well recovered from the 2001-2002 slump. Growth is expected to moderate to 4.8% in 2008 and 4.9% in 2009.

Frozen beef was Alberta's top export to Hong Kong in 2007, worth $24 million, down 5.5% from 2006. Canola oil exports were worth $23 million, up 51% over 2006. Nickel exports were worth $16 million, up from zero exports in the last three years. Alberta exported $12 million worth of raw hides to Hong Kong in 2007, but this is down from a $31 million peak in 2004. Ethylene polymer exports, though, were up 66% to a record $12 million.

EUROPE

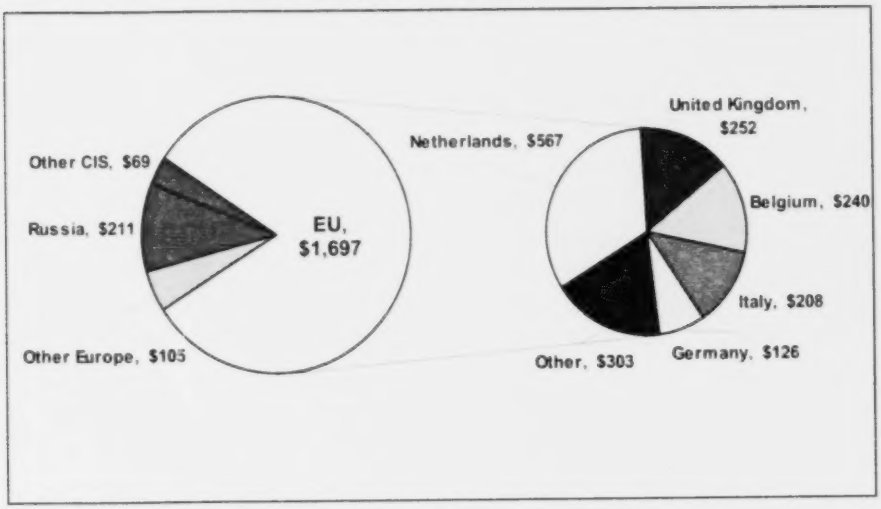
After recovering in 2006 and 2007, European economies are forecast to slow in 2008 and 2009. European Union GDP grew at 2.9% in 2007 but this is expected to decline to 1.7% in 2008 and 1.3% in 2009. Within the EU, Euro zone countries grew by 2.6% in 2007 and are forecast to grow by 1.5% in 2008 and 1.2% in 2009. The lower numbers for Euro zone countries compared to the EU as a whole reflect the more rapid expansion of the new member states, which have not yet adopted the Euro. The economies of the 11 newest member states (excluding Malta) grew by 6.1% in 2007 and are forecast to grow by 4.9% and 4.4% in 2008 and 2009 respectively.

Outside of the EU, Canada has completed a free trade agreement with the countries of the European Free Trade Association (EFTA), composed of Switzerland, Norway, Iceland and Lichtenstein. The Swiss economy expanded 3.1% in 2007, driven by exports and private consumption, but this is expected to slow to 1.9% in 2008 and 1.3% in 2009. Norway's economy grew by 3.7% in 2007, with forecasted growth of 2.5% in 2008 and 2.2% in 2009.

For members of the Commonwealth of Independent States, growth has been strong on high energy prices. The Russian economy expanded by 8.1% in 2007, with forecasted growth of 7.5% in 2008 and 6.8% in 2009, though the IMF and the World Bank have warned that the Russian economy risks of overheating. Alberta's other significant export market in the region, Kazakhstan, grew its economy by 8.5% in 2007, though this will slow in 2008 and 2009 to 5.9% and 6.2% reflecting the dampening effect of the global credit squeeze. Inflation in 2008 is estimated to be over 18% but this should begin to fall in 2009.

Alberta also exports significantly to Turkey, which grew at 4.5% in 2007, which is expected to remain unchanged in 2008, dipping slightly to 4.3% growth in 2009. Progress towards Turkey joining the EU has been slow.

Distribution of Alberta's Exports to Europe and the CIS in 2007
Total = $2.1 Billion ($CDN, Millions)



Alberta's Exports to Europe and the CIS ($CDN, millions)

Country	2005	2006	2007	2006-2007 % Change	2007 Share Region

The Netherlands remained Alberta's top export destination in Europe in 2007, with exports up 83% to $567 million. This was followed by the United Kingdom, up 5.5% to $252 million and Belgium, up 58% to $240 million. It should be kept in mind that these may simply be ports of entry into the European Union and not necessarily final destinations for Alberta's exports.

Alberta's fourth most important export destination in Europe in 2007, and twelfth overall, was Russia. Exports rose 48% in 2007 to $211 million. The bulk of Alberta's exports to Russia in 2007 were composed of oil and gas equipment. In 2007, Alberta exported $111 million worth of machinery, up 108% over 2006 exports. The second most important export sector was specialized vehicles, worth $31 million, up 14% from the previous year. Additionally, Alberta exported $9.7 million worth of tools, $6.0 million of iron and steel products, and $5.4 million of precision instruments. Non energy related industry exports to Russia in 2007 included $9.5 million of pork (down 53% from 2006), $10 million of chemicals and $5.5 million in live cows.

The European Union

Taken as a whole, the 27 countries of the European Union were Alberta's third most important export market in 2007, after the United States and China. 2.1% of Alberta's total exports or 15% of Alberta's non-US exports are destined for the EU. Alberta's exports to the EU leapt 41% from 2006 to 2007, from $1.2 billion to $1.7 billion (new member states have been retroactively added to 2006 export figures).

Alberta accounted for 5.4% of total Canadian exports to the European Union in 2007, behind Ontario, Quebec, British Columbia and the Northwest Territories.

Distribution of Alberta's Exports to the EU in 2007 ($CDN, millions)

Country	2005	2006	2007	2006-2007 % Change	2007 Share Region

The Netherlands, followed by the United Kingdom and Belgium were Alberta's top export destinations in the EU, but again it must be cautioned that these are also ports of entry and may not indicate the final destination for these exports within the European Union.

Alberta's Top 20 Export Sectors to the EU in 2007 ($CDN, millions)

Sector	2005	2006	2007	2006-2007 % Change	2007 Share Total
Nickel	$ 382.9	$ 353.9	$ 751.1	112.2%	44.3%

One single product accounted for 44% of Alberta's exports to the European Union—nickel. Nickel (along with cobalt) in Alberta is produced from ore imported from mining operations in Cuba. Because of the origin of the ore, this nickel and cobalt cannot be exported to the United States. The average price of nickel increased 55% in 2007, which combined with a 38% increase in the quantity shipped resulted in a 113% increase in the value of exports to the EU to $751 million. Cobalt prices increased 47%, which combined with a 10% increase in price for a 62% increase in the value of exports to $79.6 million. These two products accounted for 87% of the rise in Alberta's exports to the EU in 2007.

After nickel, Alberta's next most important export sector to the EU was machinery, with a value of $173 million in 2007, up 15% over 2006. Turbopropellers were the most important machinery export product, with $64 million in shipments to the EU in 2007, up 24%, followed by parts for boring and sinking machinery, worth $21 million, up 42% in 2007. Gas pumps and compressors ($11 million, up 95%) and valves ($9.8 million, down 21%) were other important machinery export products from Alberta to the EU.

Alberta also exported $62 million in electrical machinery (up 39%), $55 million in precision instruments (down 7.2%), $32 million in vehicles (up 287%), and $26 million in iron and steel products (up 294%) to the EU in 2007.

Alberta exported $158 million worth of cereals to the EU in 2007, up 49% over 2006. Cereal exports were composed of $108 million of wheat and $48 million of durum wheat. Other agricultural exports included $28 million of canola oil, down 54% from $61 million shipped in 2006; $23 million worth of meat—primarily horse meat; $19 million worth of beans and legumes; and $17 million worth of seeds (flax, mustard, fescue, etc.).

Other important Alberta export sectors to the EU in 2007 included $53 million in woodpulp (down 26%), $50 million in energy ($34 million in coal and $16 million in refined oil), $27 million in inorganic chemicals, (up 17%) and $23 million in plastic (up 40%).

The United Kingdom

After strong economic growth of 3% in 2007, the UK economy is forecast to slow in 2008 to 1.3% in 2008 and 0.4% in 2009 before recovering after 2010. The UK was Alberta's second most important export destination in the European Union in 2007 and seventh worldwide. Exports to the UK rose 5.5% in 2007 to $252 million from $239 million in 2006.

Wheat was Alberta's most important export to the UK, valued at $54 million in 2007, up 70% from the 2006 value of $32 million. This was followed by exports in the machinery ($45 million, down 8.4%), electrical machinery ($41 million, up 64%), and precision instrument ($35 million, down 14%) sectors. Alberta also exported $14 million of coal to the UK in 2007.

Alberta accounted for 2.2% of Canada's total exports to the United Kingdom, down from 2.6% in 2006.

Germany

Economic growth in Germany is expected to slow from 2.5% in 2007 to 1.9% in 2008 and 1.6% in 2009. This decline is attributable to lower growth in fixed investment and exports, though private consumption growth should recover somewhat after a long period of stagnation due to strong employment creation and wage growth

Germany was Alberta's fifth largest export destination in the European Union and eighteenth globally in 2007. Total exports fell 16% from 2006 to 2007, to $126 million. Vehicles (trailers and semi-trailers) was Alberta's top export sector to Germany, worth $28 million in 2007, up from negligible numbers in previous years. This was followed by machinery ($28 million, up 87%) and canola oil ($17 million, down 74% from $65 million in 2006).

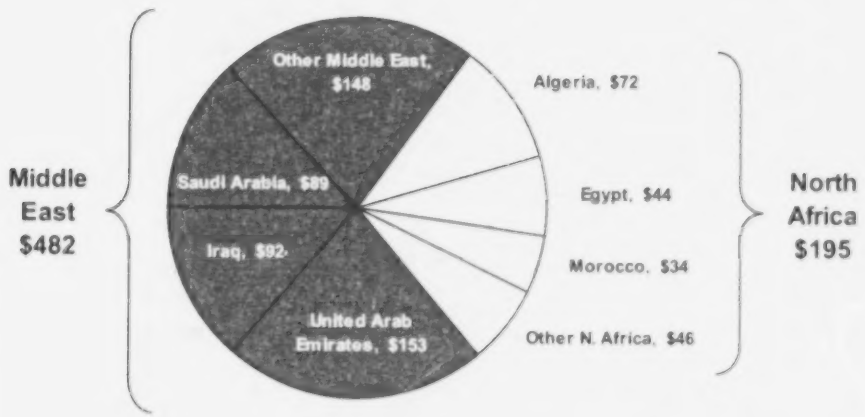
Alberta accounted for 3.6% of total Canadian exports to Germany in 2007, down from 4.2% in 2006.

MIDDLE EAST AND NORTH AFRICA

The 20 countries of the Middle East and North Africa (MENA) absorbed a total of $677 million of Alberta's exports in 2007, up 0.6% from $673 million in 2006. This was equivalent to 0.8% of Alberta's global exports or 6.1% of exports excluding the US. Exports to the countries of the Middle East rose 3.8% to $382 million and exports to North African countries declined 6.4% to $195 million.

The MENA region will be one of the world's few continuing high economic growth in 2008 thanks to continuing high energy prices. Growth in 2007 was constrained to 5.5% by oil production cuts by the region's OPEC members and capacity constraints. In 2008, however, growth is expected to increase to 6.6% and 6.5% in 2009, though inflation, at a forecast 14.8% in 2008 will be a problem, particularly for oil producing states.

Distribution of Alberta's Exports to the M. East and North Africa in 2007 ($CDN, Millions)



Alberta's Exports to the Middle East and North Africa ($CDN, millions)

The United Arab Emirates is the most important MENA export destination, accounting for 23% of Alberta's exports to the region. Exports were up 7.9% to $153 million. The biggest export increase in the region, though, has been Iraq, where exports have risen from only $1.2 million in 2005 to $48 million in 2006 and then up by a further 91% to $92 million in 2007. Iraq is now Alberta's second most important export destination in the region. Wheat exports alone, though, account for almost all of these gains. Saudi Arabia was Alberta's third most important export market in the region, with sales up 41% to $89 million. Exports to the fourth and fifth largest MENA markets, Algeria and Egypt, though, declined by 7.7% and 42% respectively, to $72 million and $44 million.

Canada is negotiating a free trade agreement with Jordan, though Alberta's exports to this country were only worth $1.5 million in 2007.

The MENA region is a major destination for Alberta cereal. In total, Alberta exported $254 million of cereals to the region, composed of $125 million of wheat (down 8.8% from $138 million in 2006 but up a lot from only $5 million in 2005), $79 million of durum wheat (up 66% from $47 million in 2006), and $50 million of barley (up 240% from $15 million in 2006). Most wheat exports go to the Middle Eastern countries and most durum wheat exports go to the North African countries. Alberta also exported $37 million of canola seeds in 2007, down 18% from $45 million the previous year, all to the United Arab Emirates.

Other than agri-food, the majority of Alberta's exports to the region are composed of machinery, equipment and instruments for the energy sector. In 2007, Alberta's second most important export sector to the region after cereals was machinery, valued at $232 million, down 12.5% from 2006. The fourth largest export category was electrical machinery ($30 million, up 1.7%), followed by precision instruments ($24 million, down 60%), and iron and steel products ($19 million, up 74%). Alberta also exported $8.8 million in special purpose vehicles to the region.

LATIN AMERICA AND CARIBBEAN

This region is where Canada is most actively involved in free trade partnerships. Canada has existing FTAs with Chile and Costa Rica, has recently completed agreements with Peru and Colombia, and is in negotiations with the fifteen full members and five associate members of the Caribbean Community (CARICOM); the Dominican Republic; the Central American countries of Guatemala, El Salvador, Honduras and Nicaragua; and is in preliminary discussions with Panama.

The IMF reports GDP growth for the Latin America and Caribbean region (including Mexico) of 5.6% in 2007, though it is forecasting this growth slowing to 4.4% in 2008 and 3.6% in 2009. Latin American economies will benefit from continued strong demand in Asia for commodities, though prices might well decline from current peak levels. The US downturn will affect those Latin American and Caribbean countries more dependent on exports to the US or remittances from workers in the US. A decline in US tourism to the Caribbean will also have an impact. Inflationary pressures from higher food and energy prices will persist in the coming year.

Alberta's overall exports to the region rose 15% from $630 million in 2006 to $725 million in 2007. Exports to South America increased 39% to $725 million, exports to the Caribbean fell 7.3% to $136 million and exports to Central America fell 64% to $28 million. The sharp drop in exports to Central America was due to shipments of crude oil dropping to zero from $56 million in 2006.

Alberta's top export sector to the region in 2007 was Cereals (almost all wheat), valued at $257 million, up 51% from $171 million in 2006. The next most important export sector,

at $180 million, up 43% in 2007, was Machinery. This was followed by Sulphur ($65 million, up 16%), Malt ($34 million, up 40%), and Electrical Machinery ($31 million, down 13%).

Distribution of Alberta's Exports to Latin America and the Caribbean (Excluding Mexico) in 2007 ($CDN, Millions)

SUB-SAHARAN AFRICA

Sub-Saharan Africa absorbed $298 million of Alberta's exports in 2007, an increase of 53% from $194 million in 2006. South Africa, followed by Sudan accounted for almost 2/3 of Alberta's exports to the region. Wheat accounted for more than half of total exports, valued at $153 million, up 68% from the previous year. Sudan, South Africa and Ghana were the primary markets. Machinery was the next most important export sector, worth $56 million in 2007. Chad, Nigeria and Gabon were the top destinations. The third most important export from Alberta to Sub-Saharan Africa was sulphur, worth $30 million, all of it destined for South Africa.

The IMF reports that the region's GDP grew by a healthy 6.8% in 2007 and forecasts that this growth will continue at 6.6% in 2008 and 6.7% in 2009. The IMF reports that the region's imports of goods grew by 14.7% in 2007, though this will slow to a growth in imports of 11.0% in 2008 and 9.1% in 2009. At 21%, Angola led Sub-Saharan Africa GDP growth in 2007. For major Alberta markets, South Africa grew at 5.1% in 2007, but this is expected to slow to 3.8% in 2008 and 3.9% in 2010 due to electricity shortages

and inflation. Sudan grew at 10.5% in 2007, with forecasted growth of 7.6% in 2008, rising to 12.7% in 2009.
